Teaching Strategies For Nurse Educators (3rd Edition)

Synopsis

This student-friendly, easy-to-read text is the best resource for the nurse educator. *Teaching Strategies for Nurse Educators, 3e*, prepares graduate nursing students to be nurse educators in settings of staff development, patient education, or academia—covering commonalities of teaching that pertain to all three. Based on a strong foundation in educational theory and practical teaching strategies, constructive information and cutting-edge content emphasize the theories and strategies most likely to be used in the field of nursing and health education. References to the most current evidence-based research on effective teaching practices are imbedded throughout the text. This book guides the nurse educator through the entire teaching process, from planning learning to conducting classes, applying traditional teaching methods and innovative technology, both in the classroom and within the context of distance learning platforms. After studying this text, the new (or renewed) nurse educator will be able to teach with a sound understanding of basic learning theory and an excitement about the many approaches she or he can use to achieve desired learning outcomes.

Teaching and Learning Experience

This book offers a current look at teaching strategies for educators in the nursing and health fields. It provides:

Customer Reviews

This textbook was required for one of my graduate classes. It's one of the few books I've kept as a reference. Ended up using it for several more classes and have cited it in numerous research papers. The text layout looks dense, but it's easy to read. Includes updated teaching approaches and distance learning considerations. Incorporates various teaching/learning theories, but emphasizes student responsibility for the learning process. Am glad I was introduced to this author.

This book is a treasure and contains a treasure of information. It is definitely worth the investment.

Well organized, easy to read with a wealth of information.

Using in PhD courses. Used older version in MSN courses and have been very happy with textbook, easy to read.

Good book
